

GCCTAAATCC

The image displays a DNA double helix structure with a sequence of nucleotides. The top strand consists of a yellow 'G', a blue 'C', a red 'T', two green 'A's, a red 'T', and a blue 'C'. The bottom strand consists of a blue 'C', a red 'T', a green 'A', a red 'T', a yellow 'G', and a red 'T'. The base pairs are connected by red and green horizontal bars, indicating the hydrogen bonds between the complementary bases.
