

Sequence logo for the 12th position of the sequence GTCATGTCCTCC. The logo shows the relative frequency of each nucleotide (A, C, G, T) at this position. The y-axis represents information content in bits, ranging from 0 to 2. The x-axis represents the probability of each nucleotide. The sequence is GTCATGTCCTCC. The 12th position is 'C', which has a high probability and information content.
